

On-Board Camera Order Form

All On-Board camera equipment is to remain the property of Alpha Live Ltd or of any of its 3rd Party suppliers. Alpha Live will fit and install the camera equipment into the vehicle and will have a Support Operative onsite who can assist and maintain the On-Board Equipment during the event.

The Support Operative from Alpha Live will work with your team to ensure a suitable and safe mounting of the equipment. All equipment used is 4G based, during testing at the circuits visited by the series we've achieved stable connections. It's worth noting there is always risk of minor outages or signal disruption which can be outside of our control.

For the best results, we will aim to mount the encoding device in a location where its antenna's can point upwards and have minimal obstruction. All equipment can run off its own power sources, so no power source is required within the vehicle.

All on-board equipment shall be collected after the vehicles last session of the race weekend, should the equipment still be fitted when you are ready to leave, please reach out to your Support Operative and they'll endeavour to remove as quickly as possible.

Please do not tamper with the equipment installed within the vehicle, our team will show you how to verify it's connected, should there be any issues our Support Operative shall be notified and be out to assist.

To secure your on-board camera based on the attached pricing list please complete the form below and send back to info@alphalive.co.uk before 20th December.

Our team shall then generate an invoice which is payable upon receipt to confirm your order request.
